INNOFARM Regulations
Visitor Code

Access to the INNOFARM path is only allowed on foot.

Visitors must not approach any work areas that may be present within the Experimental Agricultural Company.

Visitors are requested to respect the collections, not to cut or damage plants or parts of them in any way, and not to move or remove the plant name tags. Do not ingest plant material in any form, as it may be toxic or dangerous. Leaves, fruits, and other plant parts may only be collected with the authorization of the farm Director.

Along the INNOFARM path, there may be toxic or poisonous plants that, if ingested or touched, can cause serious problems, especially for children. Please be vigilant, and supervise your children closely.

Dogs and other animals are not allowed (even if on a leash, in bags, or held in arms), except for guide dogs for the blind and visually impaired.

Littering is prohibited. Please use the appropriate waste containers for recycling in the designated refreshment areas.

Do not step on cultivated areas; always walk along the established paths and trails, following the signage.

Lighting fires is strictly prohibited

For safety reasons and animal welfare, please follow these rules:

- Do not feed the animals, as they have specific diets.
- Do not cross fences, as this could be dangerous for both you and the animals.
- Avoid disturbing animals with shouting, loud noises, or other disruptive behavior.
- Do not bang on fences.
- Do not throw objects at the animals.

Children must be accompanied and closely supervised by an adult at all times. School groups and group visits should be conducted in an orderly manner, always under the direct supervision of guides and chaperones.

Setting up tables or recreational structures, sunbathing in swimwear, or walking shirtless is not permitted.

Bicycles, rollerblades, skateboards, and other recreational items (balls, kites, frisbees, etc.) are not allowed within the INNOFARM path.

Due to the high risk of fire, smoking is only allowed in designated refreshment areas, where the use of personal portable ashtrays is recommended.

Do not interfere with the work of farm staff or other personnel, but carefully follow all their instructions and suggestions.

Photography and video recording are allowed only for personal use. Professional activities require prior authorization from the Management.

The Farm Direction declines all responsibility for accidental damage to persons or property resulting from the violation of the above rules or other causes (wind, falling trees or tree parts, breaking glass or pots, insect stings, etc.). Staff involved in the INNOFARM path are authorized, if necessary, to prohibit the stay of anyone engaging in inappropriate behavior.
